Power Probe IV - Circuit Tester

DESIGNED IN USA

POWER PROBE®

Innovation to Advanced Circuit Diagnostics

Official Distributors for

ZENITH

G-SCAN

POWER PROBE

POWER PROBE® IV - Advanced Circuit Diagnostics

The All New POWER PROBE IV FOR TECHNICIANS OF ALL LEVELS

VDC Mode
DC Voltmeter with the Ability to Activate Components with Battery Power or Ground

Fuel Injector
Simultaneously Displays Injector On-Time, Inductive Kick Voltage, ECM Ground Voltage and Injector Supply Voltage

Power Feed Test
Display Resistance in Ohms & Compares Battery Voltage to Tip Voltage

Frequency Counter
Display Hertz and Both Neg/Pos Pulse Width

AC Volts RMS
Standard AC Voltmeter RMS and Displays the Min/Max Values

ECT Mode
Detects the ECT Transmitter Signal on Contact with Probe Tip

AC Volts P-P
Peak to Peak AC Voltmeter which Displays Total Voltage Between the Lowest-Highest AC Signal and Displays Min/Max Values

Driver Tester
Verifies Proper Operation of a Pull Down Output Driver
