TEXA Gasbox - Petrol Emission Analysis

Innovation to Petrol Vehicle Emissions Testing

Official Distributors for

OPABOX – Diesel Emission Analyser

External Battery Pack

Overview

With Vehicle emission testing being a requirement worldwide Texa brings you a portable system for Petrol Gas Analysis. Using Bluetooth connection to a PC / Laptop the software has an intuitive & user friendly interface. Running tests as well as official emission tests are covered.

The Gasbox has an optional portable trolley with external battery pack for mobile use (approx. 6 hours).

As South Africa joins the rest of the world mandating emission testing the Gasbox will become a piece of equipment that you will need to invest in to take part in the process of certifying car emissions as part of the vehicle inspection and testing process.

Specifications

- Dimensions - 460 x 200 x 250mm
- Weight - 6,5Kg (15Kg with Trolley)
- Internal - 2 x 12v 7Ah Batteries
- Consumption - Max 80W
- Serial Port - RS232 Standard
- Wireless Output - Bluetooth
- Reset & Calibration - Electronic
- Technology - NDIR
- Heating time - 100 Seconds
- Response Time - 15 Seconds
