TEXA Konfort 712T - R1234yf or R134a Aircon Recycling

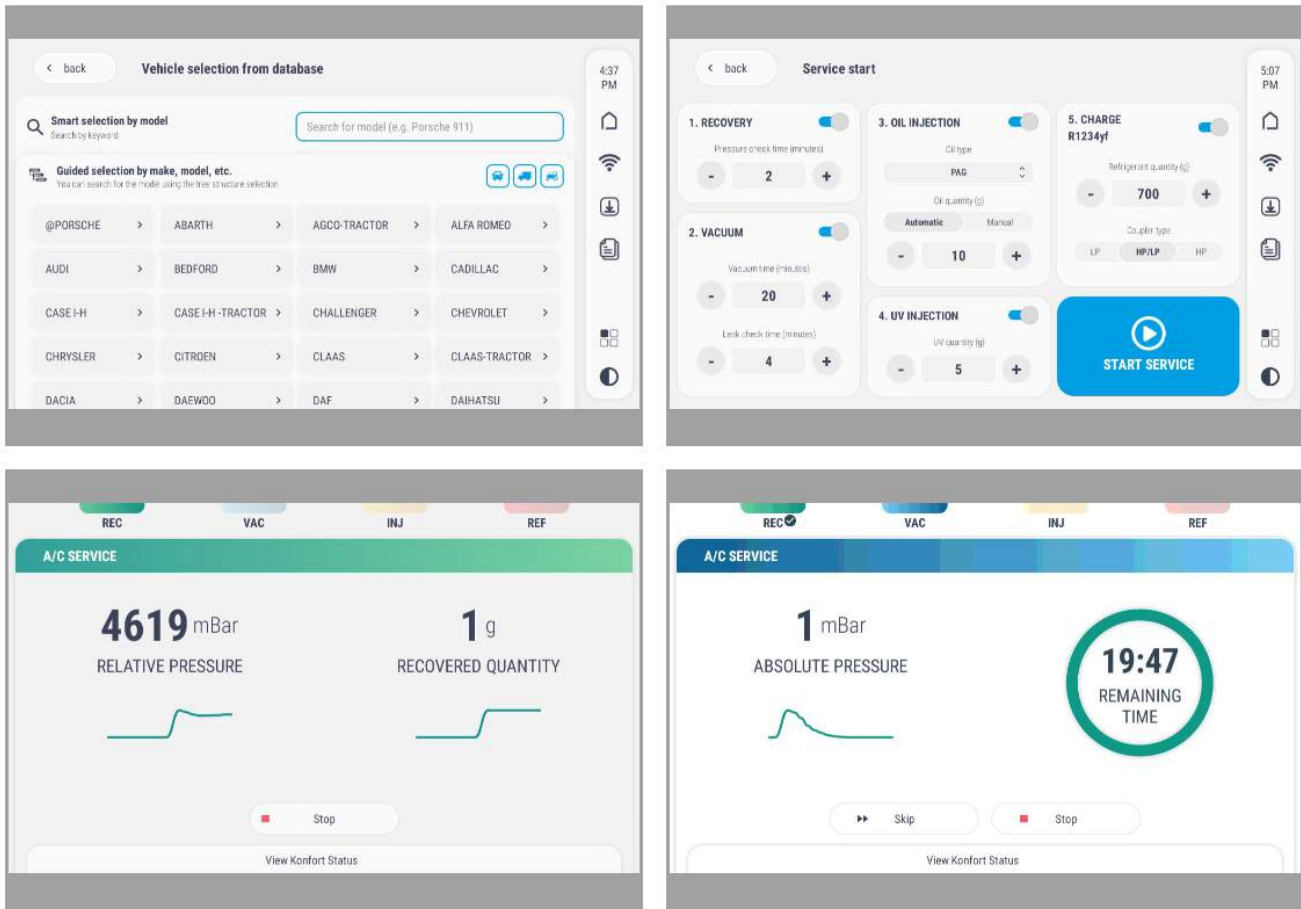

Innovation to Automatic Aircon Recycling

Official Distributors for

Konfort 712T – Automatic R1234yf or R134a Recycling

Overview

The KONFORT TOUCH charging stations are equipped with a 7-inch colour multi-touch screen display, which gives them great usability providing a clear view of the operations to perform. The innovative graphic interface has been developed to ensure a really intuitive user experience simplifying operation.

Data reading is best supported by the high resolution and nits brightness.

An interesting feature is also the possibility for the operator to choose between a light or dark theme for the background.

The display on the KONFORT TOUCH stations features glove-touch technology, which ensures perfect use while wearing different types of work gloves.

The stations are also equipped with a practical USB port, which can be used to back up the reports of the services performed and the entire system.

The KONFORT charging stations conform to European CE/PED safety standards, to the American standards governing refrigerant purity (SAE J2099 for both R134a and R1234yf) and to those governing efficiency in the recovery of at least 95% of used refrigerant (SAE J2788 for R134a and SAE J2843 for R1234yf).
