TEXA Opabox - Diesel Emission Analysis

Innovation to Diesel Vehicle Emissions Testing

Official Distributors for

ZENITH G-SCAN

POWER PROBE

OPABOX – Diesel Emission Analyser

Overview

With Vehicle emission testing being a requirement worldwide Texa brings you a portable system for Diesel Opacity Measurement with an extremely user friendly interface that covers both running tests as well as official emission tests required by law.

The Opabox is provided with a portable trolley as well as internal batteries for mobile use (approx. 2 hours). For extended mobile use there is an expanded battery pack that give about 6 hours worth of testing.

The unit is Bluetooth enabled and uses this method to connect to the PC / Laptop running the emission testing software allowing you to record the test results.

As South Africa joins the rest of the world mandating emission testing the Opabox will become a piece of equipment that you will need to invest in to take part in the process of certifying car emissions as part of the vehicle testing process.

Specifications

Dimensions – 460 x 200 x 250mm
 Weight – 6,5Kg (15Kg with Trolley)
 Internal – 2 x 12v 7Ah Batteries
 Consumption – Max 80W
 Serial Port – RS232 Standard
 Wireless Output – Bluetooth
 Reset & Calibration – Electronic
 Technology – Green LED Diode
 Heating time – 5 Minutes
 Chamber Length – 200mm
 Temperature – 75 Deg C
